

Who we are

We are the country's leading environmental contractor specializing in the construction and maintenance of methane gas recovery systems for solid waste landfills throughout North America. Together with our sister company, Diamondback Works, we have the ability to deliver turnkey project solutions including renewable gas-to-energy power plant design and build along with the full field installation of landfill gas collection systems. Our team, with over one hundred years of experience in GCCS development, has successfully completed over 1,000 projects on behalf of every major waste company in the industry and municipalities across the U.S.

Our Services

We offer technical expertise in the construction and drilling of methane gas recovery systems, continually applying innovative technologies to improve environmental protection and regulatory compliance for our clients and their operating environment. Our services include stand-alone construction for all methane gas and leachate collection systems. We successfully deliver projects of various sizes and complexity on-time and within budget that include landfill expansions, retrofits, upgrades, repairs, and rebuilds. Tri Con is a leading expert in HDPE fabrication, civil construction, concrete foundations, and general construction.

Partial Menu of Service Options

Landfill Methane Recovery Systems

Landfill Methane Gas Wells

Dual Containment Piping

Sump & Pipe Fabrication

Flare Installation

Industrial Piping

Hourly Operated Equipment Rental

Construction Management

Budget Estimates

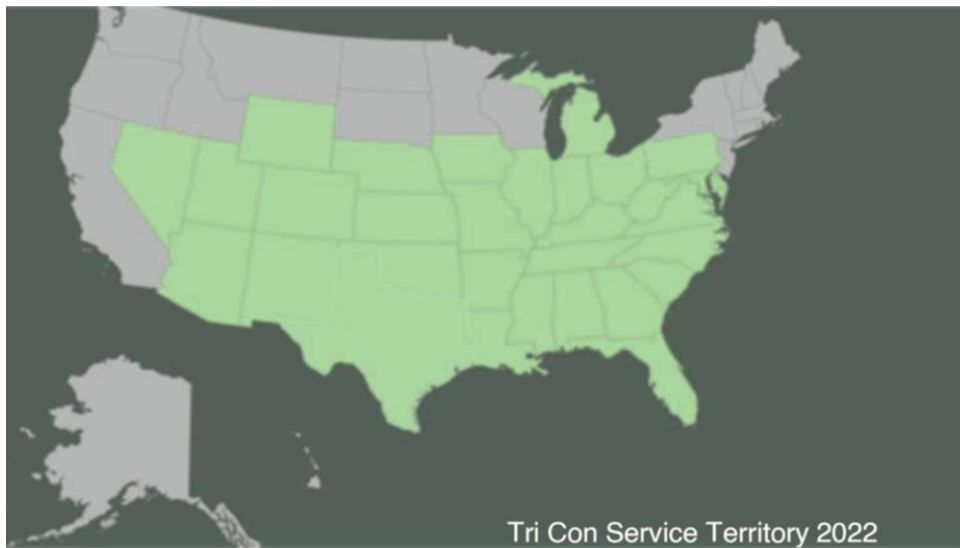

Concrete Foundations

General Construction

Our Company

Tri Con Works (TCW) operates throughout the US and will continued to expand our service area as necessary to accommodate our clients' needs. We are uniquely positioned in the industry to “follow” our customers into new territories as required.

The company has multiple drill rigs in our asset pool along with strategically based construction crews, which allows us to rapidly respond to service requests across the country in the most efficient and cost effective manner.

Since our founding in 1998, we drilled and installed over 700,000 feet of vertical extraction wells and installed more than 10,000,000 feet of lateral, header, horizontal collector, air supply, and forcemain piping to assist in the collection and processing of landfill gas.

Due to its longevity and associated expertise, TCW has established one of the most efficient and least disruptive construction process for the industry allowing our customers to maintain or expand their operations without interruption.

What Makes Us Different?

- First and foremost, our company operates under the framework of a “zero incident culture” which has allowed us to post a .04 TRIR aggregate score since 2017.

Our ability to take care of each other not only improves our operational efficiency but also makes us an attractive home for the industries' most capable performers creating long term standards of quality, stability, and continuity to our workforce.

- Our dedication to **Workface Planning** is especially important in today's environment where we all must be cognizant of the social implications that have been imposed on us due to Covid-19. Using our proprietary strategic planning process that organizes in advance all of the critical components necessary for project implementation, we routinely deliver safe, efficient, and effective project execution that offers improvement in personnel alignment and collaboration, increased labor productivity, and the highest level of customer satisfaction in the industry.
- Tri Con Works adheres to the **highest levels of universal health and safety standards** ensuring our workforce is trained and operates within all federal, state, and local EH&S requirements. Special accommodation is given to LFG specific safety training and can be customized to fit customer centric qualifications.
- Any activity associated with excavation, re-grading, and re-vegetation will be managed to comply with all laws and regulations, in particular, those associated with waste, waste water, and stormwater management. Our operating procedures are centered around environmentally secure and responsible practices that minimize the effect on the environment maximizing our customers' ESG scores.

Taking Care of Each Other

*Safety – Zero Incident Culture
Safety Orientation
Continuous Training
Pre-job Planning
Reporting, Correction, Recognition*

*Safety – Performance
.04 TRIR
"Listening Walks"
Key Performance Indicators*

- We track all of our physical and personnel assets using **integrated GPS and Active RFID technologies**, a practice that is unparalleled in the sector. Having greater visibility to our operations provides for better asset management and utilization extending the asset lifecycle and improving the security and accountability for all on-site equipment and personnel. This practice effectively maximizes our use of resources including raw materials, energy, and water allowing all of our operations to minimize greenhouse gas emissions.

- We partner with our customers to ensure that all of our operations are consistent in supporting our clients' sustainability initiatives in both the administrative and operational functions.
- We live by our **Core Values**:
 - **Do Things The Right Way**: No matter the cost or consequences, we do what's right.
 - **Take Care of Each Other**: We watch each other's backs, create a safe and productive workplace; each of us doing our part for the good of the whole.
 - **Continuous Improvement**: We build our team with a focus on "A" players who we hire for attitude and continuously train to be multi-crafted, multi-skilled.
 - **Have Fun**: TCW promotes a "lighthearted" atmosphere where there is no fear and personnel are always encouraged "to make someone's day".

Our Customers

Tri Con Works provides engineering and construction services for some of the largest municipalities and public companies in North America. Since our founding in 1998, we have completed over 1,000 projects in the LFG sector, and in combination with Diamondback, we are now able to expand our service to the general industrial market. Here is a sample of our clientele:

Public Waste Companies:

Clean Harbors
Waste Management
Waste Connections
Republic Services
Waste Corporation of America
Waste Industries
GFL Environmental

Municipalities:

City of Grand Prairie, TX
City of Farmers Branch, TX
City of Snyder, TX
Jefferson Parish, LA
Miami Dade County, FL
Santa Fe SWMA, NM

Independent Power Producers:

DTE
EDL
Energy Power Partners
MAS Energy
Morrow Energy
River Birch
Montauk Energy

Industrial:

Lyondell Basell
JX Nippon
Valvoline
Goya Foods
Syngenta

Multi-year Development Plan

We are strong advocates of using a systematic approach when planning for GCCS build outs and recommend including a multi-year development process. This longer term view provides the following:

- Maximizes client and vendor coordination
- Provides long term efficiencies in logistics and asset allocation
- Ensures continuity of the budgetary process over a longer horizon
- Financial benefits from economies of scale
- Consideration of the whole project life cycle

Multi-site Bundled Contracts

With our operational capabilities that span throughout the US, Tri Con Works has the unique capability to offer bundled service contracts at both the regional and national level. Combining or aggregating multiple projects into one contract allows both the client and TCW to gain the financial and operational benefits as follows:

- Continuity in quality control
- System wide performance standards
- Single point of accountability
- Discounted service offering
- More efficient use of physical and personnel assets

Summary

Tri Con Works, LLC® is please to make this introduction and outline our company's capabilities in providing Gas Collection and Control Systems engineering and construction services. We are a company that has:

- A Safety First Culture
- Core Values Driven
- Experienced "A" Team Players
- Structured Process
- Systematic Program Management
- Nationwide Footprint
- Innovative and Technology Driven

We look forward to having continued conversation with you and explore how TCW can become a valued construction services partner.
